DEFINITIONS AND PREAMBLE		

DEFINITIONS

The required definitions are listed in Appendix B of MMEL Policy Letter 25. Additional definitions may be included in an operators MEL as desired.

PREAMBLE

The applicable preamble must be inserted in the operator's MEL from current FAA Policy Letter PL-34 or Policy Letter PL-36.

GUIDELINES FOR (M) & (O) PROCEDURES

The Flight Operations Evaluation Board has identified a need for certain procedures to provide an adequate level of safety while providing relief for some items. These procedures must be established by the operator and may be based on the aircraft manufacturer's recommended procedures, Supplemental Type Certificate modifier's recommended procedures, or equivalent operator procedures. When recommended procedures are published the operator should comply with these procedures. If recommended procedures are not published, the following guidelines delineate the aspects to be considered by the operator in the development of required procedures, excluding Non-Essential Equipment & Furnishings (NEF) (M) and (O) procedures.

Cessna has developed recommended (M) maintenance and (O) operational procedures for the Cessna 208 Master Minimum Equipment List (P/N ###MELCL-XX-XX as amended). Operator's MEL procedures should be based on the Cessna procedures.

For items not listed in Master Minimum Equipment List Operational and Maintenance Procedures Manual published by Cessna Aircraft Company, the following guidelines are provided to help establish required operator procedures.

22-10-06 (O) Operations procedure for operating radar with manual tilt adjustment, and loss of roll stabilization.

24-22-02 (O) Operations procedure for operating radar with manual tilt adjustment, and loss of roll stabilization.

33-40-08 (M) Maintenance procedure to pull and secure circuit breaker.

34-25-02 (O) (all) Operations procedure to ensure crew awareness of inoperative systems or functions and alternate procedures for inoperative functions. NOTE: Procedures must ensure that erroneous or misleading information is not displayed.

76-00-01 (M) Maintenance procedure to deactivate lock assembly in accordance with STC SA01296SE instructions and aircraft maintenance manual guidance.
